As noted in earlier announcements, we are seeing unprecedented increases in all products, especially steel pipe.

Looking forward, there is a high likelihood that there will be additional increases in steel pipe & other products beyond the first quarter of 2008. In all probability, we will continue to see additional increases well into the second quarter of this year. All steel pipe producers have also instituted a price based on date of shipment and many of them have their production schedules booked 8-10 weeks out. We strongly recommend escalation be included in any bids. We will keep our customers posted with all of the latest developments, as they become available. If you require additional information, feel free to contact your FFF sales representative. As always, thank you for your business and support.

Sincerely,
